THE FUTURE GAME

RULES

The game consists of a set of hundreds of questions related to the future.

Each player answers one different question in turn. For each answer, the other players each judge the answer on a scale of 1-10. Therefore the players must be skilled story tellers or perhaps even good liars.

In the course of a game each player has three passes. If the player passes then the player on the right must answer the question.

Players can play as many rounds as they like, usually they agree at the beginning of the game. The scorecards can be used for up to 20 rounds in a game. But players could of course play more if they wish.

The winner is the one with the highest total score after all rounds are completed.

The more players the better it is, but you could have fun just playing with 2 people.

Have fun. Enjoy the game!
